Education

Full Stack Web Development

Masai School

Mar 2022 to Feb 2023

Master of Business Administration

VNS Institute of Management, Bhopal

Jun 2016 to Apr 2018

Professional Summary

Detail-focused Full Stack Web Developer specializing in the MERN stack and Next.js. Expert in creating engaging products, combining frontend and backend logic to reduce costs. Skilled in Redux Toolkit, TypeScript, ShadCN, TRPC, and Prisma ORM with MySQL. Proven success in international projects.

Experience

Software Development Engineer Intern

Masai (Full Time)
Oct 2023 - Mar 2024

NextJs: Implemented responsive Next.js solutions with SSR and ISR.

Prisma ORM: Developed API routes and managed databases efficiently using Prisma ORM.

Dashboard: Designed and integrated dynamic Shadcn dashboard for analytics.

Crafted AI prompts: Designed and wrote AI prompts to facilitate interactions with ChatGPT

Business Development Executive

Digitals India Security Products Pvt Ltd (Full Time)
Aug 2019 - Feb 2022

Led a team of 26 associates: Coordinated 22 field and 4 office-based associates for seamless operations.

Built strong business relationships: Regularly met with bank officers across Madhya Pradesh and Chhattisgarh.

Value Proposition

Why hire me:

Cost-Effective Full Stack Expertise: As a Full Stack Developer proficient in Next.js, I streamline development by combining frontend and backend logic, reducing the need for separate hires and lowering overall development costs.

Advanced Technical Proficiencies: Skilled in Redux Toolkit, TypeScript for type safety, and ShadCN for customizable UI components, ensuring scalable, maintainable, and modern designs. Proficient in TRPC for efficient data fetching, utilizing controllers for streamlined development without separate routes or API endpoints, ensuring strong type safety.

Robust Backend Development: Proficient in Prisma ORM with MySQL, creating efficient, scalable database solutions, and successfully designed and implemented a complete backend system for a Norwegian-based company, showcasing capability in managing international projects remotely.

Projects

SNAPPY APP

Developed a robust and scalable real-time chat application using Socket.io.

Features: Multi-platform Support, User Authentication & Authorization, Select Avatars, Real-Time Notifications, Real-Time Message Delivery, Emojis Support.

Tech stack: React, Socket.io, NodeJs, MongoDB, Styled Components.

Solo Project: This solo project highlights my ability to independently create and deliver a real-time chat application, focusing on user-centric communication.

Evvent As

Worked as a part-time developer at a Norwegian-based company.

Schema Design with Prisma: Collaborated with Evvent As to design and implement database schemas using Prisma, ensuring efficient data management and scalability.

Dashboard Development with Shadcn, Prisma, TRPC, and Tailwind CSS: Built dynamic dashboards for data visualization using Shadcn, integrating with Prisma for data querying and management. Implemented responsive UI components with Tailwind CSS to enhance user experience.
